

Magento Connect Extension: BusinessPost

Mad Capsule Media are pleased to offer Magento to BusinessPost integration, using the modular Magento Connect architecture.

Our UKMail Business-Post Magento module allows you to send your orders to Business-Post and receive back consignment numbers and send tracking emails to customers, automatically.

Module Features:

- Send some/all or none of your shipments from Magento to your Business Post system at the click of just one button.
- Have tracking information emailed to your customers using your Magento email template to comply with your branding, automatically.
- Differentiate between the shipments sent from your Magento store and your other websites, locations, brands or companies. *

Requirements:

- Magento 1.3.x or Magento 1.4.x
- UKMail / Business-Post Account & Consignor Despatch System, provided by Business-Post.
- Either a route in to your consignor queue via FTP or mapped drive. (We can provide instructions on how you can do this).
- * To be able to differentiate between shipments sent from your different Magento stores and/or other locations or companies you must have multiple 'companies' setup within Consignor.

Pricing

Please contact us on 0117 369 0112 for information on pricing.

Setup

Our module is easy to install. Just upload the package to your Magento installation and enable it from the administration area of Magento. We can install the module on your behalf for a one time fee of £15 plus vat. Please note that this price does not include setting up an FTP account or mapped drive.
